- ¹ "Single use license" means a license must be dedicated for each computer or network access point that has use rights for the Software, Data, or Documentation. Licensee may make a second copy for Licensee's exclusive use on a portable computer so long as only one (1) copy of the Software, Data, and Documentation is in use at any one (1) time.
- ² "Concurrent use license" means a license that permits execution of the Software on any computer on the network. The number of simultaneous/concurrent users may be controlled by a License Manager to access and use the Software, Data, or Documentation.
- ³ "Server license" means the serverside Software that resides on a per computer server basis and provides services to multiple users in a global client/server distributed computing environment.
- ⁴ "Organizational license" means the Software, Data, and/or Documentation may be used, reproduced, displayed, and redistributed for use by all users within the given licensed organization.
- ⁵ Node-locked license (UNIX only) is a dedicated license that allows the quantity of authorized network users to use the software concurrently on one (1) computer.
- ⁶ Extensions to Software programs follow the same scope of use as that granted for the corresponding Software programs. For example, if you order an ArcInfo extension, then that extension is also licensed for concurrent use.
- ⁷ Licensee may use the Software for Internet access provided that the source and object code are not accessible to users of the application, and that Licensee does not generate revenue directly by charging for access to the site or service by selling data, pay-per-view, or subscription fee, or similar means by utilization of the Software.
- ⁸ ESRI and its licensor(s) grant Licensee a nonexclusive, nontransferable, limited license to use, copy, and prepare derivative works by
 - (a) Translating "alroute.mld" (hereinafter "Dictionary") from the original text in the English language;
 - (b) Editing Geographic Data Technology (GDT) Data included within ArcLogistics Route; and
 - (c) Adding Data (owned by Licensee or others) to ArcLogistics Route Software.

The license grant is conditioned as follows:

- (a) The derivative works are for Licensee's internal use only;
- (b) ESRI and its licensor(s) retain all exclusive right, title, and interest in and benefits from the derivative works, except Data owned by Licensee or others; and
- (c) Licensee expressly waives and relinquishes any and all ownership including, but not limited to, copyright, moral rights, or any other statutory or common law claims to the derivative works, except for Data owned by Licensee or others.

Licensee shall not translate, modify, or edit in any way the software name "ArcLogistics Route," software logo, any third party software, any text other than the Dictionary, or any Data other than GDT's.

The amount of Data used by Licensee is limited by Data credits purchased. Additional license fees are required if ArcLogistics Route with Data is to be accessed by more than one (1) ArcLogistics Route license.

- ⁹ ArcPad software is currently GPS-enabled for use with Trimble, Magellan, and Ashtech brand GPS receivers within the territory of the United States. Beginning one degree in latitude and longitude outside any United States' territorial border, ArcPad software is GPS-enabled for all compatible GPS receiver brands. ArcPad SOFTWARE IS NOT LICENSED FOR NAVIGATIONAL USE OR FOR USE ON U.S. REGISTERED AND OPERATED VESSELS.
- ¹⁰ This is a "Dual Use License," meaning the Software may be installed on a desktop computer and either a Personal Digital Assistant (PDA) or handheld mobile computer provided that the Software is only used by a single individual at any one (1) time.
- ¹¹ Developers shall not deploy or allow to be deployed the MO20.LIC or WEBLINK.LIC files or related updates. Developers must attribute as follows: "Portions of this computer program are owned by LizardTech, Inc., and are Copyright © 1995–1999 LizardTech, Inc., and/or the University of California. All rights reserved. U.S. Patent No. 5,710,835."
- ¹² Other restrictions notwithstanding, Licensee may redistribute commercial applications to its sublicensee(s) under a written sublicense agreement that protects ESRI's rights in its Software, Data, and Documentation to the same extent as the ESRI License Agreement, and that includes the following terms, as a minimum:
 - (a) Sublicensee may not reverse engineer, decompile, or disassemble the ESRI Software, Data, or Documentation, except to the extent permitted by applicable law, copy for commercial use, transfer, or assign its rights under the license grant; and
 - (b) Sublicensee may not use any ESRI Software, Data, or Documentation, in whole or in part, separate from Licensee's executable application.
- ¹³ Developers shall not deploy or allow to be deployed the MOLT20.LIC file or related updates. Redistribution of MapObjects LT components is on a royalty-free basis. Developers must attribute as follows: "Portions of this computer program are owned by LizardTech, Inc., and are Copyright © 1995–1999 LizardTech, Inc., and/or the University of California. All rights reserved. U.S. Patent No. 5,710,835."
- ¹⁴ Subject to an annual renewal fee.
- ¹⁵ Licensee may only use this technology in conjunction with a custom software application developed by ESRI Professional Services.
- ¹⁶ Unless there is a statement to the contrary in the metadata, Licensee may use, copy, reproduce, publish, publicly display, or redistribute map images derived from the Data in hard-copy or static, electronic formats (i.e., .gif, .jpeg, etc.), provided that Licensee affixes an attribution statement to the map images acknowledging ESRI or its licensors as the source of the portion(s) of the Data displayed, printed, or plotted.

General Notes:

- A. Use of ESRI Software, Data, or Documentation in a commercial Application Service Provider (ASP) business model is subject to execution of a written ASP license agreement and the payment of the appropriate additional license fees. For purposes of this Agreement, a commercial ASP means a Licensee who uses ESRI Software, and who operates the site or the service for a profit, and directly generates revenue by charging for access to the site or service (by selling data, pay-per-view, subscription fee, or similar means).
- B. Except for the Server License grant above, ESRI does not permit a Licensee to make the ESRI Software, Data, or Documentation available to third parties for remote geoprocessing or on a global server for access by foreign affiliates or other third parties.

ESRI, ArcView, SDE, ArcIMS, PC ARC/INFO, ArcCAD, *BusinessMAP*, and MapObjects are trademarks of ESRI, registered in the United States and certain other countries; registration is pending in the European Community. ArcInfo, ArcEditor, ArcSDE, *RouteMAP*, ArcLogistics, Atlas GIS, MOLE, ArcPad, ArcExplorer, NetEngine, and StreetEditor are trademarks of ESRI.
